with the click Garage
Lining System.*

Simple. Smart. Robust.

- Can be fitted to virtually any existing garage. Insulated if required
- Suspended ceiling if required
- Integrated shelving systems, workbenches, tables or desks can be added

The simple but very strong 'clicK system' is put to effective use in the assembly of lining units within sectional concrete buildings. A light alloy frame is secured to the garage frame and assembled incorporating vinyl coated plaster board panels giving a clean, bright appearance at the same time providing a rigid secure structure.

EXAMPLE: One building - Two uses!

12ft 6 wide X 16ft 6 long garage incorporating 'office' 8ft 6 long x 12ft wide
and storage space 7ft x 12ft giving 'office' 55% / storage 45%.
